PROFIGYMMAT®

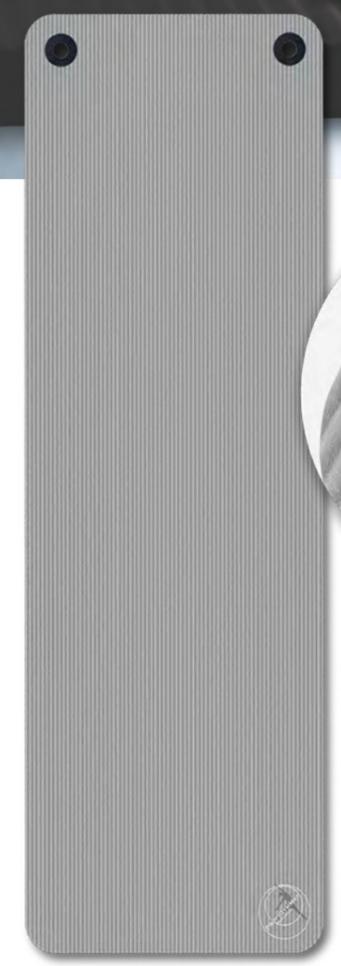

ProfiGymMat®

180 x 60 cm, 110 KG/m³
Material: NBR

Like all of our ProfiGymMats, the ProfiGymMat® consists of the soft and stable NBR foam. With a density of 110 KG / m³, this ProfiGymMat is the softer version and is used particularly in the private sector. The food-safe material is characterized by its particularly mechanical resistance and is therefore particularly durable. The mat is BPA-free and therefore suitable for pregnancy exercises and fitness with children.

- resilient
- tear-resistant and dimensionally stable
- Easy adaptation to the substrate
- Comfortable and flexible
- Super-hygienic due to the closed cell structure
- Antibacterial protection
- Easy to clean with water

PROFIGYMMAT® PROFESSIONAL

ProfiGymMat® Professional

180 x 60/80 cm, 170 KG/m³
Material: NBR

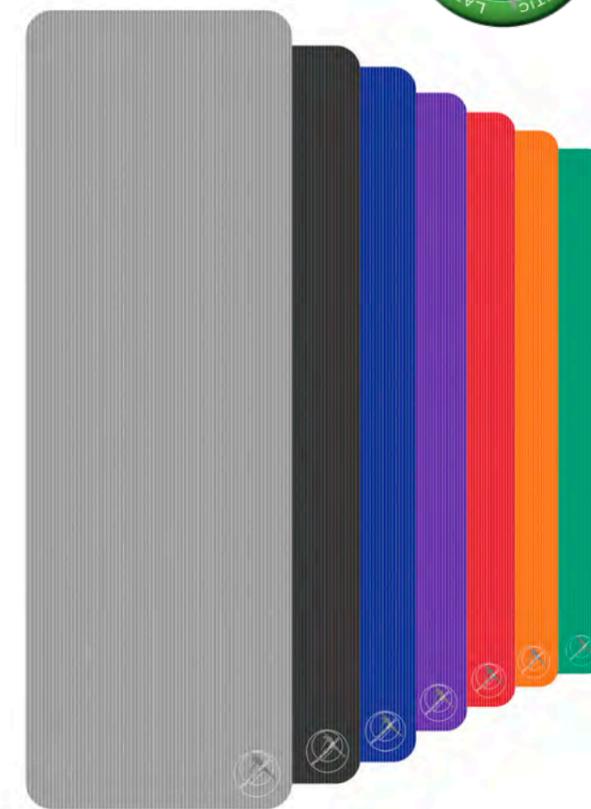

The ProfiGymMat Professional is extremely robust with a material density of 170 kg / m³. Due to the new vertical structure, the mat wears less. This makes them even more comfortable and increases their durability at the same time. The mat is BPA-free and therefore suitable for pregnancy exercises and fitness with children.

The quality of the new generation of ProfiGymMat® Professional speaks for itself and meets the highest demands in all professional areas.

- Stays resistant, supple and stable in shape even under high performance
- Tensile strength
- Long life
- Comfortable, flexible and flat lying
- Easy rolling and unrolling
- No sticking-out corners
- Optimum shock absorbing
- Both sides usable, in the studio, outdoor and in water
- Super hygienic because of closed cellular structure
- Anti-germ protection
- Hydrophobic and dirt-repellent
- Easily cleanable with water

- Different length 120 | 140 | 180 | 190 cm
- Different thickness 1 | 1,5 | 2 cm
- 7 different colours
- With or without Rings
- Material NBR

YOGAMAT

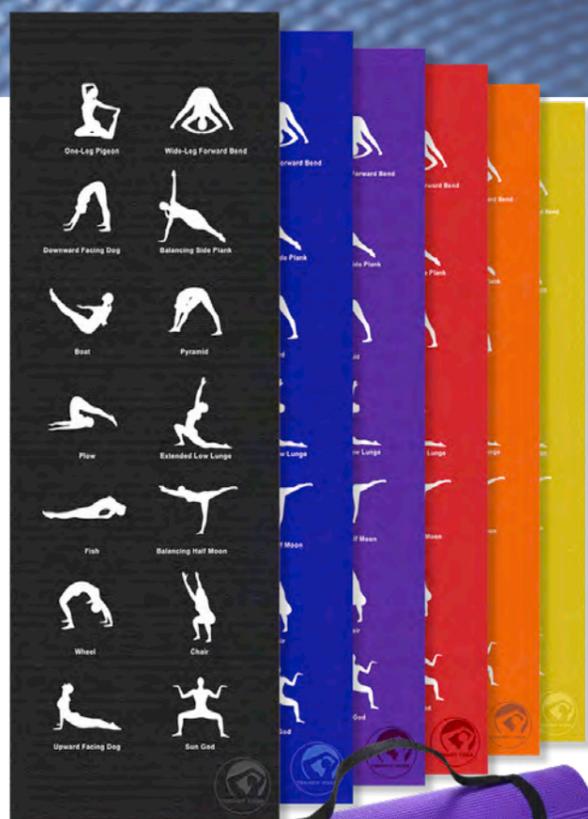

YOGAMAT PROFESSIONAL

Trendy YogaMat

Art. No. 9220
180 x 60 x 0,5 cm
Material: PVC

The new Trendy YogaMat was specially designed for yoga exercises at home and facilitates your training with printed exercise examples. The material is very skin-friendly and has shock-absorbing properties that are gentle on the joints. Compared to natural rubber mats, this mat is particularly suitable for allergy sufferers. The water- and dirt-repellent surface is also easy to clean and prevents the accumulation of germs.

With the **Yoga Swing Impulso** tension can be released and strength can be built up at the same time. The rocking leads each position in the horizontal and vertical plane into the depths of yoga.

Basically, it is easier to give up your own body weight from a hanging position and conversely it is easier to engage in stretching. This goal is achieved especially with a 'head - over - position' and the entire back including the spine is relieved. Back problems in particular can be counteracted positively. Since most of humanity suffers from back problems, inversion therapy is an indispensable part of the Trendy Impulso. Neck and pelvic problems can also be eliminated with the appropriate exercises. This training device convinces with numerous positive effects. These include not only a deeper breathing technique, increased sense of balance, reducti-

on of stress and better stretching, but also an expansion in strength, flexibility. The confidence in your own body can be extremely strengthened.

The Trendy Impulso contains some loops and handles to hold on or to relieve certain parts of the body. The stable fastening material can also be purchased.

- Inversion Therapy
- Greater freedom of movement
- The rocking deepens the yoga positions in the horizontal and vertical plane
- Much deeper breathing techniques, increased balance and better stretching are possible
- Relieves back-, neck- and pelvic-problems
- Several loops and handles for holding or to relieve certain parts of the body.
- Stable fixing material can be purchased additionally

ACUREWELL®
PICATA

Acurewell® - Acupressure mat Picata

Art. No. 9420N
 Size mat: 68 x 42 x 2cm
 Size pillow: 37 x 15 x 10 cm
 Material: 100% Cotton, ABS (spikes)

The acupressure mat Picata with 180 massage points, together with the neck pillow with a further 54 massage points, can help you fight head, shoulder and neck pain. This pain is often caused by stress, little movement and poor posture. Both acupressure products are delivered in a practical cotton bag and can be used anywhere and quickly stowed away. Both the mat cover and the cushion cover are removable and therefore easy to clean.

Acurewell® - Acupressure coating Picata for Bamusta Cuatro XL

Art. No. 9423N
 Size: 48 x 48 cm
 Material: 100% Cotton, ABS (spikes)

This acupressure cover with 168 massage points fits perfectly on our balance pad BAMUSTA 9000XL (page 66) and thus expands its range of functions to save space. An elastic band on the back ensures that the cover cannot slip.

Acurewell® Acupressure pillow Picata

Art. No. 9422N
 Size: 30x40cm
 Material: 100% Cotton, ABS (spikes)
 Filling: Buckwheat hulls

Our new acupressure pillow Picata from the acupressure product range Acurewell effectively relieves your head, shoulder and neck pain, which often results from stress, little movement and poor posture. The treatment resembles a pleasant head massage and can be used anywhere and at any time with the handy pillow size of 40x30cm.

The principle of action of acupressure is based on the millennia-old tradition of Chinese medicine and ensures that the life energy flows through the body without interference via meridians and thus creates physical and psychological well-being.

The acupressure products stimulate the blood circulation through their massage pressure points and also stimulate the production of endorphins, which has a positive effect on the sensation of pain. In addition to pain relief, positive effects such as stress relief or the relief of sleep disorders are also achieved.

The products consist of 100% natural cotton and are extremely pleasant and skin-friendly due to the temperature and moisture regulating properties of the cotton.

By purchasing a product made from a renewable raw material, you also support a sustainable product cycle. The AcuReWell Picata pillow is filled with heat-retaining and breathable buckwheat husks. It adapts perfectly to your neck contour and can therefore optimally support muscle relaxation.

Treat yourself to your wellness oasis for your home NOW and relax with our AcuReWell Picata pillow - strength lies in peace!

ACUREWELL®
SILENSIA

Especially in our fast-paced times, it is important to find peace inside - meditation can create a balance in hectic everyday life to relax and recharge your batteries. A stable sitting posture is very important when meditating in order to be able to sit relaxed in the various meditation postures for a long time and to avoid postural damage. With a meditation seat cushion, overstressing the knees can be avoided, the weight on the back and pelvis is better distributed and blood circulation is promoted. Silensia also facilitates a back-friendly and upright posture, which allows the chest to open and you can breathe freely. The pillow cover is made of a pleasantly soft velvet fabric, which can be removed via a zipper on the underside of the pillow and washable at 20 °.

The Silensia cushion is filled with heat-storing and breathable buckwheat hulls, which adapt well to your seat and thus offer additional support and stability. Create your haven of calm now and breathe deeply in and out with Silensia!

Acurewell® - Meditation cushion Silensia

Art. No. 9421A, 9421VI
Material: Velvet
Filling: Buckwheat hulls
33x33x13cm

Our meditation seat cushion Silensia from the Acurewell product range supports you in taking a comfortable and gentle sitting position during meditation.

With the dimensions 33x33x13 cm, the seat cushion is always at hand at home or in the studio and can also be an atmospheric seat and oasis of calm in your living room.

NEW DESIGN & MATERIAL

**MAROLA
& PREGO**

Trendy Marola

Art. No. 9102
 Ø 13 cm / 30 cm
 Material: EVA, ABS (tube and cap)

With the help of the stable and robust surface structure of the fascia massage roll, an excellent trigger point therapy can be brought about and a complete muscle massage can be achieved. This is particularly important because the everyday stress on our body can lead to one-sided stress on the muscle and fascia tissue.

As a result, the cells store more fibers, which causes the tissue to become denser and the circulation to be restricted, so that shortened and densified muscle areas are formed, so-called trigger points.

Incl. new sales packaging

Trendy Connector

Art. No. 9122

With the Trendy connector you can connect two Trendy Marola or Prego fascia rolls to each other and thus get a 60cm long fascia roll for an even more diverse choice between exercises while standing, lying or sitting. To do this, you have to unscrew a cover from the roll and screw in the connector between the two rolls.

Connector
9122

RRP
5,90 €

Trendy Prego

Art. No. 9104
 Ø 13 cm / 30 cm
 Material: EVA, ABS (tube and cap)

The pyramid-shaped massage points of the Trendy Prego® are especially suitable for deeper lying and more firmly seated tension in the muscle areas of the lower extremities, the back and to stabilize the trunk. The gently curved center relieves the spine and at the same time provides an intensive massage of all adjacent muscle areas. Accessories such as the Trendy Tres Forca can be stored inside the roll and closed with the screw cap.

PONTIA & ONDAS

Massage Roll Pontia

Art. No. 9106
 Ø 7 cm / 39 cm
 Material: EVA, PP (cap), POM (tube), TPR (grip)

Incl. sales packaging

When using the Trendy Pontia you have an active and quick regeneration of the tissue. The soft tissue components of our connective tissue are known as fascia, which span our body like a net. The fascia are also involved in important movements and metabolic processes. Due to the pyramid-shaped elevations, lower-lying fascia can also be reached and thus resolved as a re-

sult of regular use, which in turn promotes and increases blood circulation. Thanks to the handles, the roller is stable and secure in your hands and thus also makes it easier to reach places such as the neck, legs, arms and shoulders.

The roller cover a wide range of applications and, thanks to their comfortable size, fits in any sports bag.

Massage Roll Ondas

Art. No. 9107
 Ø 7 cm / 39 cm
 Material: EVA, PP (cap), POM (tube), TPR (grip)

The wave-shaped massage roller Ondas does not work as deeply into the muscles as the Pontia massage roller and acts a little more gently.

ESTRELA

Trendy Estrela

Art. No. 9114A
 Ø 14 cm / 32 cm
 Material: EPP

The robust fascia massage roller with a star profile, with its high-quality surface, provides excellent trigger point therapy and muscle massage. Tension or painful parts of the body are specifically treated. The fascia roll consists of two rolls that are inserted into each other and can be used together or separately. With this fascia roll you have an even greater choice between standing, lying or sitting exercises. The fascia roll is made of environmentally friendly EPP material. The rolls can be manufactured with a minimal consumption of resources and easily recycled. The fascia roll is not only particularly light and therefore mobile, it is also easy to clean.

NEW MATERIAL

BOLA

Fascia Ball Bola

Article No. 9116
 Sizes: Ø 6cm / Ø 8 cm / Ø 10cm
 Material: EPP

The fascia ball series was mainly developed for the self-treatment of trigger points and tension. With the help of the compact size, even small, deeper and therefore difficult to reach tensions in fascia and muscles can be achieved. This means that trigger point therapy can be used, which is especially important today. Our body is exposed to a lot of stress every day, which is mainly due to an often unfavorable work posture, too little exercise or too much stress. As a result, unilateral stress can occur in muscle and fascia tissue, causing the cells to begin storing more fibers. The consequences should not be underestimated as the tissues become denser and harder, which reduces blood flow. This allows shortened and com-

pressed muscle areas to form within a muscle, the so-called trigger points. These can spread to other parts of the body and cause severe pain there. With the help of constant pressure and regular use of the fascia balls at these points, the tissue can be relaxed and the trigger points released. Choose the right size for your fascia ball and determine the intensity of your massage yourself!

TRES FORCA

Fascia Ball Tres Forca

Art. No. 9113
Size: Ø 6,5 cm
Material: PVC

Trendy Tres Forca was specially developed for the self-treatment of trigger points and tension. The shape allows even small and deeper tensions in fascia and muscles to be worked on well. The intensity of the pressure exertion can be determined individually. There are also two different degrees of hardness to choose from.

Targeted and regular pressure applications can help to gently release tension, which can have a positive effect on pain relief.

- Targeted self-massage for small and difficult to reach places
- Intensity through own pressure exertion and 2 degrees of hardness
- Punctual advance of deep tension
- Trigger points can be edited easily
- Versatile to the head, temple, arms, legs, neck and more
- Convenient for on the road, handy
- Loosen and strengthen bonded fascias

Due to one-sided stress in the muscle and fascia tissue, permanently shortened and thickened muscle areas from within the muscle, the trigger points, which can be very painful. Constant pressure on these trigger points leads to the relaxation of the tissue.

Trendy Ponte

Art. No. 9117
Size: 31 x 29 x 9,5 cm
Material: EVA

Trendy Ponte offers you through its two-sided Possible uses a very extensive spectrum of possible uses. With the help of the pointed elevations and the depression in the middle, the board can be used particularly well for fascia training. Above all, the supine position, in which pressure is created by lowering the pelvis, is particularly effective in mobilizing, stretching and strengthening the lower back. Not only can the trigger points be determined individually, but a massage effect can also be created. But the effects can also be felt during fascia training while standing, as the foot is mobilized and the

balance is strengthened. In addition, the calf is stretched, the foot lift and balance are trained. The Trendy Ponte is not only suitable for fascia training, but also for the fitness area. It can be used as a rocker crosswise or lengthways to bring yourself off balance through conscious movements. A particular success is achieved in the areas of stabilization, balance and stretching.

LACADA

Secure seams

Anti-slip handles

Numbered belt

Stainless steel carbine

Trendy Lacada

Art. No. 5060
 Max. length: 2,6 m, 38 cm wide
 Material: Nylon (strap), stainless steel (carabiner),
 Neoprene (pad in foot sleep)

The Trendy Lacada suspension trainer is a full-body training device for fitness, physiotherapy or home training which, with the help of your own body weight and high body tension, addresses all muscle groups extremely effectively and trains strength, coordination and flexibility. With variable leverage and height settings, Lacada offers a very large selection of exercises while standing, sitting or lying down. Lacada can be attached to a ceiling suspension (not included) or, in the private sector, can also be clamped in the door frame using the supplied clamp fastening.

The soft neoprene pad on the foot straps provides additional comfort. Along with our non-slip handles, secure double seams and high-quality stainless steel carabiners we offer you a training device of the highest quality!

NEW PRODUCT
BARIGA

Bauchroller Bariga

Ø 17 cm, 25 cm
Material: Stahl, PP, PVC, TPR

The Bariga abdominal roller is the ideal training accessory for even more intensive abdominal muscle training.

In addition to the abdominal muscles, the back, buttocks, arm and leg muscles as well as coordination and body tension are addressed. The training device is suitable for advanced users who already have a certain body stability. Thanks to its compact design, the ab roller is not only suitable for the fitness area, but is also always ready for use on the go. The scooter can be easily disassembled by pulling off the rubber grip caps and stowed away even smaller.

The handles offer thanks to the corrugation and the grooves a secure hold during training and that rubberized profile wheel ensures a comfortable and padded run.

HEX DUMBBELL

Hex Dumbbells

Hex Dumbbells

Matching dumbbell pyramid Art. No. 2090W
for 10 pairs of hex dumbbells see page 94

Hex Dumbbell

1 Kg - 30 Kg
Material: Chromed steel, Rubber

The high-quality hexagonal shaped dumbbells are available in 20 sizes from 1 kg to 30 kg and therefore offer the right weight for every training level. The hexagonal shape makes the dumbbell even more robust and prevents it from

rolling away. Together with the ribbed chrome-plated handle, the Hex Dumbbell offers even more comfort and safety during training. The rubber coating already covers both the barbell and the floor.

ATS -Premium Polyurethan Disk

Inside diameter: Ø 50 mm
Material: Cast iron, PU

Our new Aperto Trendy Sport polyurethane disks impress with their unique design - with the black matt surface, which is interrupted by gray sporty lines, they not only set new optical standards in weight training and fit on any barbell with a 50mm diameter. Thanks to the PU coating, the disks are extremely abrasion and scratch resistant and therefore very durable. The four integrated anti-slip handles ensure ergonomic handling. The ATS disks are available in seven different weight levels from 1.25 KG to 25 KG.

TRENDY SPORT®

**FLOORING
MATS**

Rubber Flooring **Segura** Interlocking

DENSITY 1000

NEW PRODUCT

Rubber Flooring Segura Interlocking

100 x 100 cm | 1 m²
Density: 1000kg / m³
Material: 100% recycled Rubber

With our Rubber Flooring Segura system, we offer you high-quality floor mats in five different thicknesses for your fitness and weight areas and thus maximum safety during training, effective noise reduction and optimal protection of your floor.

With a density of 1000kg / m³, our mats are extremely hard-wearing and are particularly suitable for equipping professional fitness and weight training areas. Our long-lasting system in classic black consists of 100% recyclable and environmentally friendly rubber granulate. It is therefore pleasantly warm, comfortable and gives a joint-friendly running feeling.

Thanks to the tooth system, the mats can easily be laid loosely and do not slip due to their high weight and surface adhesion.

The 100x100cm mats can be individually adapted to your room conditions and with their high abrasion resistance they are the perfect choice for use in fitness studios, playgrounds, kindergartens and much more. Tripping edges are avoided by the bevelled edge and corner strips and therefore offer additional safety and comfort. Create the right foundation for your fitness area NOW, because the premium material is tailored to the needs of your customers

Product characteristics

Rubber Flooring Fina Interlocking

DENSITY 1100

NEW PRODUCT

Rubber Flooring Fina

100 x 100 cm | 1 m²

Density: 1100kg / m³

Material: 100% recycled Rubber

With our Rubber Flooring Fina system, we offer you high-quality floor mats in three different strengths for your fitness and weight areas and thus maximum safety during training, effective noise reduction and optimal protection of your floor.

With a density of 1100kg / m³, our Fina mats are even more durable and are particularly suitable for equipping professional fitness and weight training areas. Our long-lasting system in classic black consists of 100% recyclable and environmentally friendly rubber granulate. It is therefore pleasantly

warm, comfortable and gives a joint-friendly running feeling.

Thanks to the tooth system, the mats can easily be laid loosely and do not slip due to their high weight and surface adhesion.

The 100x100cm mats can be individually adapted to your room conditions and with their high abrasion resistance they are the perfect choice for use in fitness studios, playgrounds, kindergartens and much more.

Product characteristics

- Material: 100% rubber granulate
- Density: 1000kg / m³
- Sustainability - 100% recycled material
- High abrasion resistance
- Anti-slip property
- Very good sound insulation
- Easy installation and cleaning
- Edge finish with elegant bevel

Rubber Flooring Segura Roll

DENSITY 1000

Rubber Flooring ProFuTra

Set 1 | 40,5 m²
3 Rolls a 900 x 150 x 0,6 cm
 Weight/Set: 247,86 KG N.W.
 Material: 85% recycled Rubber and 15% EPDM

The ProFuTra series is the possibility to perfectly stage your own desired area for the training circle. Choose from numerous exercises which you would like to have printed on your training area and we will do the rest for you.

Of course, your own exercises can also be printed, making your training area unique! And the best of the square meter price always stays the same!

The set has a size of 9 x 4.5 m and thus consists of 3 rolls. You can also design your own training area, but the width must always be 1.5 m. Discover our practice examples!

The price shown is the qm² price.

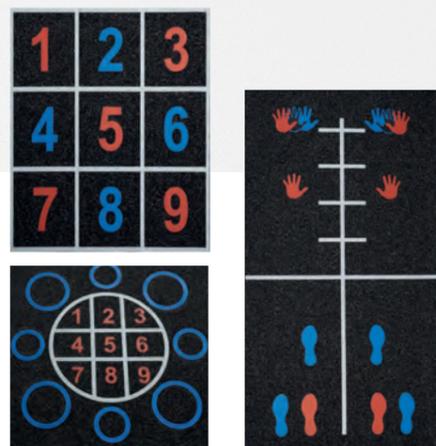

ProFuTra mat is in stock.

Rubber Flooring Segura Roll

Density: 1000kg / m³
 Material: 100% recycled Rubber

The rubber floor Segura roller offers excellent walking comfort, is sound-absorbing and is gentle on the joints. The mat is made of 100% recycled rubber and is therefore not only hard-wearing and resilient, but can also be used in gyms and commercial areas. We offer the floor in three different sizes and in thicknesses of 6, 8 and 10 mm. We recommend gluing this floor. One roll corresponds to 10 m².

Available in three different sizes:

Rubber Flooring 1000 Roll
10m x 1m x 0,6cm

Rubber Flooring 1000 Roll
8m x 1m x 0,8cm

Rubber Flooring 1000 Roll
6m x 1m x 1,0cm

Segura Rolls can be ordered with a minimum quantity of 5 pieces and delivery time of 2-3 weeks.

Studio line classico

StudioLine Classico

100 x 100 x 1,4 cm (± 0,5 mm)

Hardness 60° – 65°

Material: EVA

The point-elastic and joint-friendly StudioLine Classico flooring is extremely resistant even under heavy use and is therefore perfectly suitable for fitness studios, therapy rooms and in the aerobic area. The floor covering reduces the development of noise and therefore creates a pleasant acoustic feeling of space. Laying even without instructions is extremely easy and can be done directly on any substrate without costly preparation. The antibacterial floor is also easy to clean with water. StudioLine Classico offers a color selection between

four different colors and thus offers interesting combination options to individually upgrade your fitness area!

Product characteristics

- High quality, maximum comfort
- Point elastic
- Anti-germ
- Noise reducing
- Easy to clean without detergents (just with pure water)
